MEGA
DOUBLE-POKER

An exciting, motivating game, using player's psychology.

DOUBLE UP TO 16 TIMES

Based on a regular poker game with 52 cards, 2 jokers and 2 wild pairs.

SHARP !
EFFICIENT !
PROFITABLE !

Hi-Lo double; some cards are open, you may heve as many as 4 open cards on one row. Equal value cards don't lose.

If the card doesn't appeal to you, you may change it once before each double.

If the card still doesn't appeal to you, take the credits won; change the card a second time and keep on playing.

When you complete a row of doubles, you get your credits. You may double up to 16 times.

If you are missing a card to complete a winning hand, you may buy a 6th card.

Number of credits depends on which hand you want to complete.

Each time you get a pair of threes or a pair of fives, they are added up to reach a preset value and then automatically credited.
